Mr. Grisham:

Apparently, there are email issues surrounding your communications. I have received one liners such as:

"are you going to respond" and "here is the image".

However, there are neither specific questions for me to respond to nor are there images for me to observe. I have an opportunity on Wednesday July 1, 2015 to speak with you regarding your emails. Does 1:00 that day work for you?

Please advise,

Mark Ford
Senior Attorney/ORC

Having email problems.

Here's the other one; sorry if you got this several times:

P.S. Here the images I failed to attach to the original email:

Mr. Ford, will you be addressing my questions about the response as posed below? I consider the response incomplete due to the missing information found at the links on the page I was provided in response to my FOIA request for that information.

Thank you.

Curt

Mr. Ford, the below link works fine.

Questions regarding the information provided at the page accessed by that link:

9595790

1) Specific to the Arkwood entry, referring to the column headed "Additional Information" in which there are three (3) links: the second link down is "Site Progress Profile" and links to: <http://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0600124>

As I had questioned of Mr. Derek Ragon's responsibility for this portion of the EPA public websites over a year ago, when he claimed to me a "data formatting" issue and the use of an "intern" to complete the migration: why is the information at this area of the EPA public websites **still** so woefully out-of-date? (Please see attached screen shot; I will forward the email conversation I had with Stephen Tzhone about this from April

2014, when Stephen told me, "Your question is valid and I have requested clarification from the Information Management Team." Please note my complaints about Mr. Ragon's excuses and work product from the past.)

The initial landing page states in red: **"In 2014, the Superfund Program implemented a new information system, the Superfund Enterprise Management System (SEMS). Efforts to migrate data to SEMS and to enhance data quality control are now in the final stages. The Program will continue to rely on the final CERCLIS data set (dated November 12, 2013, which reflects official end of Fiscal Year 2013 Program progress) for public reporting until a complete and accurate SEMS data set is available."**

The above statement is not an acceptable explanation for the lack of maintenance or availability of the public information at this portion of the EPA public websites. What is the status of that data migration "technical issues" claimed to as excuse for these lacunae? When will this portion of the EPA public websites be updated or taken down completely, as the current state is misleading?

2) Regarding the Arkansas section found at the web pages accessed by the corrected link below: why is there no HRS score given for Cedar Chemical Corporation of West Helena, one of the nine (9) sites listed for Arkansas?

Thank you.

Curt

Mr. Grisham:

The problem has been found. It was a typo in the link in the letter provided to you. The below link provided by Ms. Lane does work which is what I just used and confirmed. A letter with the corrected link will be provided to you. **Until then, please use the below link to access the information.**

Also, will you please email me once you have been able to access the information via the link?

I apologize for any inconvenience this may have caused.

Mr. Grisham:

I am including the team as you did on this email asking that they address the below concern and confirm with you that the situation has been resolved.

All: Please see Mr. Grisham's concern below and reach out to him to make sure it is resolved.

Thanks,

Mark Ford
